

The forefront of vehicle tracking

VALUE THROUGH KNOWLEDGE

OnlineAVL Complete

The fullest expression of OnlineAVL Technology.
The forefront of vehicle tracking.

A serious management tool for businesses committed to optimising efficiencies across the breadth of their operations. Combining the core benefits of our entire range, with the most comprehensive selection of features easily accessible below the surface.

Rewards fully trained users with the ability to wield the full power of OnlineAVL Technology and yield maximum return on investment.

Track Measure Improve

Maximise productivity and optimise efficiencies with our most advanced and flexible technology.

Vehicle Maintenance

Effectively manage your operational capacity and equipment condition.

Receive automatic alerts and notifications when work is due. Schedule and log all maintenance to minimise downtime and ensure your vehicles are legally compliant and/or in accordance with leasing regulations.

Job Dispatch Forms

Ensure consistency in all your communications.

Customisable fixed fields ensure all essential information is included in every communication. Rely on full two-way messaging with a complete audit trail, rather than verbal recall (requires M-Nav device).

API

Integration of leading suppliers delivers the strongest solution.

OnlineAVL Technology utilises an industry standard code that enables your tracking system to interact with business management tools from other specialists. A seamless combination of the best the market has to offer.

Report Suite

The definitive collection of fleet data and analytics.

OnlineAVL Complete fully expands the report suite to include: Executive Reporting, Speed Analysis, Fleet Utilisation, Maintenance Monitoring and LCZ/LEZ Reporting. A comprehensive selection for in-depth analysis and detailed performance benchmarking.

Enhanced Geo-Search

Go back in time with ease to see your fleet's movements.

A simple, powerful way to retrospectively monitor historic vehicle journeys and answer invoicing queries. Assess the significance of vehicle traffic anywhere, from anytime.

Limitless Potential

Customise your system with our range of enhancements.
