FLEET+

Bring your system to life

VALUE THROUGH KNOWLEDGE

OnlineAVL Fleet+

Everything included in OnlineAVL Essential and more. Bring your system to life with an intuitive interface that puts complete fleet management at your fingertips. Set a new benchmark in productivity with powerful features that integrate seamlessly into your workflow, refined for usability, efficiency and return on investment.

A highly flexible, responsive solution to empower the back office, streamline tasks and deliver a superior level of control.

Limitless Potential

Find out more about our Complete product, and range of enhancements at

navmanwireless.co.uk

Dynamic Dashboard

Visualise your data with a flexible and comprehensive analytics suite.

Draw on the wealth of information collected by your tracking system and view in an easy to understand graphical format. Customise the presentation of your data, instantly monitor against KPIs and harness its full potential.

Exception Alert

Discover deviations from expected events as they occur.

Find out whenever there is an instance which 'breaks the mould' of day-to-day activity. From unauthorised vehicle use to excessive idling time – be notified immediately via desktop popup, email or text.

Smartphone App

Find out when something happens, as it happens.

Receive alerts of predetermined vehicle activity, such as ignition on/off or activation of external power sources. Configure pop-ups and audible notifications as required to ensure you always stay informed.

Scheduled Reporting

Benchmark performance when and where you choose.

Automatically generated reports, from mileage to exception alerts. Schedule for particular times and email to selected stakeholders within or outside the business, without having to directly access the system.

Street View Mapping

Get a better look with this innovative and powerful tool.

Google Street View enhances your mapping facility and enables you to get 'eyes on the ground'. Be able to see what your drivers see and guide them using geographical landmarks.

Report suite

Get a comprehensive summary of the essential information.

Valuable additional data that can help you monitor driver behaviour and ensure your fleet is working with maximum efficiency for your business, including: Idle, Peak Speed and Time Sheet Reports.
